

Nick Meincken

Front End Developer

Personal Information

Personal Profile

I am an experienced AEM Front End Developer. I specialise in creating clean semantic code to ensure fast loadtimes. I follow atomic design principles where possible and develop style guides to ensure consistent and rapid development when working as part of a team. I am as comfortable coding in raw HTML as I am using products such as React.

I enjoy working as part of an Agile team and have worked on some of the countries largest ecommerce sites.

Professional Skills

Contractor History

Texture London

Front End Developer

November 2019 -

Front end developer role with minimal back end skills for Shopify. Building online shopping portal for a luxury brand.

- Shopify, Liquid, SCSS

Signal Noise

Front End Developer

August 2019 - October 2019

Building AEM components for Siemens using postcss and PatternLab.

This project contained the use of Stylelint, PostCSS and BEM within Gulp. It drew in a lot of style rules from other projects created by Signal Noise for Siemens.

- PostCSS, Stylelint, BEM
- PatternLab, Handlebars
- React, Bootstrap, GIT

BT

Front end developer

May 2018 - June 2019

BT is a globally recognized telecoms brand. I have been working as part of the Marketing, Brand and Data teams in rebuilding their email templates in AEM for integration into ACM. My main task has been migrating and updating the email templates within AEM to be responsive with more control for the user. I have also worked on a number of microsites for campaigns within ACM (Adobe Campaign).

- AEM, ACM, GIT
- Mustache, Grunt, Node
- Email Development/Styleguide
- Granite UI, Touch UI, HTL
- SCSS, VanillaJS
- Agile, Workfront

Pomegranate

Front End Developer

July 2019 - August 2019

Building components around the bootstrap framework for a Medical website utilising Handlebars, LESS and jQuery. Sample components and page templates for a CMS. Built the base for reusable components and sections.

- Less, Gulp
- Handlebars, GIT
- Bootstrap, HTML templates

Contractor History Continued

GTA Travel

Front End UI Developer

January 2018 - May 2018

GTA Travel have been powering global travel for 40 years. I came on board as part of the marketing team to work on marketing projects and general site optimisation. I am also part of a wider group that has been tasked to create new components and develop a style guide for the site.

- SCSS, React, ATG, Jira, GIT
- Sketch, PhotoShop, InDesign
- RESTful API, Handlebars, WebPack/Gulp

MerchantCantos

Front End Developer

January 2017 - February 2017 & March 2017

Working as part of a small development team building custom websites for corporate finance using .Net and Umbraco. Support for existing websites and updating an older site to newer code base.

- SCSS, jQuery
- Umbraco
- Responsive design

We Are Social

Front End Developer

September 2016

Microsite for Blind Pig Cider using Wordpress with custom fields and utilising a mobile first design principle as well as improving the mixins for SCSS.

- Custom Wordpress components
- PHP, SCSS, jQuery

Virgin Media

Front End Developer

November 2009 - August 2016

One of the UK's leading entertainment and communication providers, I was a member of a team of developers working on moving Virgin Media to a fully responsive website and migrating from multiple instances of CQ5 to a single version of AEM6. First hand experience with AEM adapting many of the core components within AEM to modified and customised versions specifically for Virgin Media, as well as custom components.

- Building components for AEM
- Building online styleguide
- Agile work process

Soft Skills

- Agile work process
- Good communication skills
- Can work to tight deadlines
- Motivated self-starter
- Good team player
- Independently minded

Personal

- Date of Birth: April 1978
- Nationality: British
- Marital Status: Married
- Address: Surbiton, Surrey

Matter of Form

Front End Developer

May 2017 - October 2017

Working as part of a small agile development team in Old Street on a high quality, design led project updating a boutique travel website. Building on modular patterns for CSS, JS and HTML for a CMS.

- SCSS, jQuery, jQueryUI, Jira, GIT
- Sketch, Handlebars, WebPack
- Responsive component design

Rapha

Front End Developer

September 2016 - November 2016

Cleaning up the code base of this prestige clothing brand and general site and performance improvements as well as building the new about pages on Wordpress and the updated Cycle Club section.

- SCSS, jQuery, Java
- Hybris CMS/Wordpress
- Responsive design

- Responsive design
- PictureFill, CSS3, HTML5
